## DETAILED ACTION

### *Election/Restriction*

1. Applicant's election without traverse of Group I, claims 35-51 filed on September 12, 2003 is acknowledged.
2. Applicant's election of species (1) and species (6) is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the species election requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
3. Applicant's election with traverse of species (3) and (4) filed on September 12, 2003 is acknowledged. The traversal is on the ground(s) that "[A]pplicants traverse the Examiner's assertion that Species (3) and (4), represented by Claims 40 and 41, respectively, represent distinct species. For claims to be restricted to different species, they must be mutually exclusive. MPEP 806.0449. Species are always specifically different embodiments. MPEP 806.04(f). This is not the case of Claims 40 and 41. Claim 41 depends from Claim 40. Thus, the embodiments of Claim 40 comprise the embodiments of Claim 41, and thus these embodiments cannot be 'mutually exclusive'.".

After carefully considers applicant's arguments, the examiner agrees to withdraw species election from species (3) and (4) and combine claims 40 and 41 together.

- 
4. ~~After further reviewing claims 35-51, the claims contains claims directed to the following~~  
patentably distinct species of the claimed invention:

- (9) the second portion of the target polynucleotide is located immediately 3' to the first portion of the target polynucleotide (claim 42)

Art Unit: 1634

(10) the second portion of the target polynucleotide is located immediately 5' to the first portion of the target polynucleotide (claim 51)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims 35-41 and 43-50.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
